About The Faculty:

ARLENE WHITE, PT, M.ANIM ST. (physiotherapy)

Arlene is a 1998 graduate in Physical Therapy from Florida A & M University, and is certified in Equine Sports Massage through the FL College of Natural Health. She established HorsePower Equine Sports Therapeutics in 1998, and owns the Animal Rehab Institute Facility opened in 2000. Arlene completed her Masters Degree in Animal Physical Therapy at Queensland University, Australia in 2007. Her research with Dr. Clayton on proprioceptive stimulation of the equine distal limbs has been published in numerous Veterinary Journals around the world.

DR. SHANNON BUDISELIC, DVM, CERT, CVA (CAND.)

Dr. Shannon Budiselic obtained her DVM degree from the Western College of Veterinary Medicine (Saskatoon, Canada) in 2005. Upon finishing her degree, she completed an internship (Equine surgery, medicine, ambulatory) at the Okotoks Animal Clinic (Alberta, Canada). She obtained her post-graduate training as a Certified Equine Rehabilitation Therapist (CERT) through the Animal Rehabilitation Institute in Loxahatchee, Florida. Dr. Budiselic is qualifying as a veterinary acupuncturist with the International Veterinary Acupuncture Society (IVAS) and has successfully used all modalities of acutherapy in her veterinary practice. Dr. Budiselic owns Equilibrium Veterinary Rehabilitation & Consulting Ltd., a mobile, equine physical rehabilitation practice, and lives and works in Alberta, Canada.

Upon receipt of this form, we will send you a "Welcome Packet" with directions and housing/hotel information as well as a suggested reading list.

Equine Anatomy In Clay Date: \$795.00
 Equine Massage Therapist Certification
Includes Anatomy In Clay 3 day workshop Date: \$2400.00
 Introduction to Equine Meridian Therapy Date: \$675.00
 Advanced Equine Meridian Therapy Date: \$675.00

Equine Anatomy In Clay

\$795.00

No previous massage or bodywork experience is necessary, only a love for horses and the desire to learn.

Course Description: This 3-day workshop allows you to learn the musculoskeletal anatomy of the horse by building the horses muscles from the inside out onto the Equiken™ model. Participants comprehend form and function while discovering the logic of anatomy and the relationship of structures. A great learning opportunity to help you visualize the musculoskeletal system of the horse. Build on your current knowledge or satisfy a desire to learn what makes your horse move. Half day classroom building Equiken™ models half day hands-on in the barn.

Learning Objectives:

1. Understand Anatomical Vocabulary Including Directional Terminology and Veterinary vs. Layman's Terminology
2. Master the Equine Skeletal System – Axial Skeleton & Appendicular Skeleton
3. Build the Muscle System onto the Equiken™
4. Describe and Palpate all Bony Landmarks on Live Subjects
5. Outline the Superficial Muscles of the Horse using Paint Sticks
6. Understand the Function of the Reciprocal Apparatus, and Passive Stay Apparatus.
7. Perform a Basic Conformation Assessment

Cost: includes the course manual, use of model & clay during course and handouts. Prerequisite: Students must review the veterinary vocabulary and terms, skeletal anatomy, and bony landmarks in the Study Guide provided with course registration.

Equine Massage Therapist Certification

\$2400.00

(includes Anatomy In Clay Workshop)

No previous massage or bodywork experience is necessary, only a love for horses.

Course Description: This comprehensive 9-day program provides participants with a fundamental understanding of the anatomy, muscle physiology, biomechanics, and the application of massage therapy to the equine patient. Students will be instructed on different massage therapy techniques and learn how to perform a fully body musculoskeletal assessment and massage. Half of each day is spent in our classroom, and the other half is spent performing hands-on body work with horses.

Our courses are taught by highly trained equine professionals; this is the only program instructed by a Physical Therapist who holds a Masters Degree in Animal Physiotherapy. Courses are limited in size to allow students individual one-on-one time with the instructor. Skills learned in this course will allow graduates to bring benefit to horses, their owners and their veterinarians. Upon completion of this program you will be awarded with a Certification in Equine Massage Therapy.

Learning Objectives:

1. Understanding of application and theory of Massage.
2. Identify specific structures: bones, muscles, ligaments, tendons, cartilages.
3. Review the relevant muscles and tendons of the horse on live subjects.
4. Demonstrate proper technique when applying massage therapy.
5. Demonstrate the ability to palpate the relevant structures on live subjects.
6. Describe the biomechanics of joint motion, muscle action, and common injuries in the equine.
7. Discuss structural and functional relationships.
8. Identify and palpate relevant musculoskeletal abnormalities.
9. Safety issues while performing equine massage therapy.
10. Recognize normal vs abnormal gait variables.
11. Understand indications and contraindications for equine massage.
12. Discuss the unique features of an Equine Massage Therapy Business.

Introduction To Equine Meridian Therapy

\$675.00

Offered to: Equine Massage Therapist/Body-Workers or equivalent qualification who have recently completed at least one comprehensive course in equine anatomy in order to identify landmarks and locations with confidence

Course Description This 2-day seminar is designed for students or graduates of an equine massage therapy or body worker program. Students should have recently completed at least one comprehensive course in equine anatomy in order to identify landmarks and locations with confidence. This course will introduce the basic concepts of Traditional Chinese Medicine (TCM). The theoretical and practical aspects of Equine Meridian Therapy, Five Element and Muscle System Theory of Meridian Therapy and Manual Treatment of Acupoints and Trigger Points along with incorporating them into the treatment of musculoskeletal cases will be emphasized with classroom lecture and hands –on demonstrations and discussions.

Advanced Equine Meridian Therapy

(participants must complete Introduction to Equine Meridian Therapy before attending this program)

\$675.00

Course Description – This 2 day seminar will further integrate advanced concepts of TCM with the basic principles of Equine Rehabilitation.
Topics Include:

- Point Categories (Master, Command, Sedation, Luo, Xi-Cleft, Hui, He Sea, etc.)
- Pattern Differentiation of Disharmony (Zang-Fu organs, Pathogenic Factors, Eight Principles, Six Channels, Four Stages, San Jiao Patterns, Pathogen Patterns)
- Pulse and Tongue Diagnosis
- Case Studies and Discussion

Application of these concepts to holistic equine wellness will be discussed as it relates to the practitioner's particular skill-set. Students are expected to present their Case Reports for classroom discussion and shall divide their course time between lectures and equine cases. Prior to the session an on-line review (notes, assisted learning materials, quizzes) of concepts from the Introductory Equine Meridian Therapy Seminar will be provided to students.
